

NDTP1111: NDT Clinical Preparation and Practice

Credit Hours: 1.5

Clock Hours: 0/50/0

Students will prepare to perform routine and advanced studies at the clinical sites, including proper performance of activation procedures. Students will also recognize patterns at various machine settings, and supply clinical correlation to the disease process, patient's clinical presentation, and the patterns displayed.

Prerequisites:

NDTP1212, NDTP1214
